“Yes! I’ll be recommending these webinars to my colleagues as well as the Head and Neck Anatomy webinars to our new anatomy instructor. I loved the textbook info best, especially stem cells.” –A.M.

“ I really enjoyed the videos and the personality of Ms. Fehrenbach. She made the information easy to understand. It is hard to find local courses on dental Anatomy, histology and embryology. Thank you” –A.B.

“I have been in dental hygiene for 40+ years. This webinar really highlighted many facts that I have forgotten and just took for granted! It but really refreshed some of the fine nuances of dental anatomy for me. It will help me teach some of the more detailed and advanced level students. This webinar was a very thorough and in depth look at the subjects of dental anatomy, furcations, tooth morphology and occlusion. I particularly benefitted from the occlusion. Thank You. “ –M.O.

“I liked the ability to view at my own pace. I appreciated the discussion info that was provided by Joyce for reference.” –T.C.

“I’ve already told my colleagues about the course.” –D.C.

“The self paced sessions and research portion of it (specially the beyond the text book) really makes it worthwhile. It’s a good review of the basics. The “beyond the textbook” was a great addition for classroom discussions. Current and applicable knowledge.” –Z.S.

“I really like the ‘beyond the text’ info and relating tooth anatomy to instrumentation. The source links in ‘beyond the text book’ are very useful and the topics were covered well.” –K.O.

“The webinars were very concise and the up and coming theories were shared and explained. I think that the depth of the topic was perfect, and the addition of the teaching tips will really help. I really enjoyed the “Beyond the Textbook” topics as they add so much to the subjects.” –J.C.

“What I loved best about these webinars was the amount of information provided.” –L. S.

“I cannot thank you enough as the information gave me more guidance in a course just recently acquired. I believe I am on the right path to delivering a stronger and more effective course. I propose to email my colleagues with a note of encouragement and sharing the excellent experience I had. Each topic

provided more detail than needed for my course. I appreciate the additional knowledge which has aided in answering student questions. I found the 'beyond the textbook' information to be very interesting. In many cases I used the information in class to provide levity and interest." –C.S.

"I have recommended the series of webinars to my Program Director and all instructors teaching courses are going to be required to enrol in these courses. I really enjoy the enthusiasm for the material presented. I have been a clinical hygienist for over 25 years, (very active in CEU's and worked for very progressive and supportive dentists). I returned to college four years ago to complete my Master Degree and then began my journey as both didactic and clinical DH instructor. I strongly believe that Margaret brings home the didactic and the practical aspects of dentistry phenomenally well. As an instructor, I have taught Embryology, Histology, Head/Neck Anatomy, Tooth Morphology, Radiology, Dental Emergencies, Preventive, Community Dentistry, Law and Ethics. Taking these courses has given me a better understanding, more confidence and some supplemental ideas on delivering some "stuffy" material. Yes, the material 'beyond the textbook' was covered well beyond the depth of the topic. More helpful hints on teaching tooth morphology would be helpful." –S.G.

"I enjoyed being able to follow video with handouts – this made note taking much more streamlined. I really like "Beyond the Textbook" this was useful information that I was able to take back to students." –L.S.

"I loved Margaret. She is very entertaining and funny. A person can see she is very passionate about the materials she presents. I would recommend this webinar to colleagues. I would highly recommend these webinars to new teachers if they do not plan to use your textbooks. During the webinar, both Margaret and Joyce provided hints about the subject material in the textbooks that a new or 'experienced' teacher might need. The presenter goes in depth 'beyond the textbook' in the topics presented. I loved every tiny bit of material covered." –M.M.

" I loved the ability to do the webinars from home. The figures and tables were helpful. Overall the course was helpful and contained good info. I really appreciated the handouts. Thank you very much!" –E.P.

" I will inform my colleagues how informative and ease of access to the webinars offered. The speaker was very enthusiastic, provided insightful and realistic examples related to the topic. The audio and visuals were clear. The topics were concise and direct to the point. –J.F.

"Membership to FB page is a great tool!! As an educator, I will continue to use the FB information. Margaret did a good job with presenting the information. I found the "Beyond the Textbook" information and links useful tips for teaching. The webinar helped validate that I understand the material well enough to teach

it. I want to start off by saying thank you for making the Dental Anatomy and Oral Histology and Embryology webinars available along with the Head and Neck webinars! Viewing the webinars during the summer is much easier for me than during the school year. Also, kudos to you for providing such an easy way to get continuing education for these subjects! It has been hard to find continuing education courses in these areas of study.

I enjoyed the webinars! They provided me with validation that I understand the material. I enjoyed getting the additional information to pass on to my students! Thank you for your hard work and service to the dental hygiene profession!
–T.M.

“This was a wonderful course; presentations were thorough and full of useful resources. The author kept her humor of a dry topic. Very helpful handouts and illustrations. I would highly recommend BOOTCAMP. I loved the author power point presentations. I liked the handouts to refer to at a later date when presentations no longer are available. The presenter went ‘above and beyond’ the depth of the topic-so many useful resources!” –G.V.
